

# HTTP API object "webImages"

## Examples

### Action add

Upload a web image.

```
$filename = "/tmp/test_image.gif";
$handle = fopen($filename, "r");
$binary = fread($handle, filesize($filename));
fclose($handle);

$data = array(
    "token" => $token,
    "tokenHash" => $tokenHash,
    "objectType" => "webimages",
    "objectAction" => "add",
    "values" => array(
        array(
            "webimageBinary" => base64_encode($binary),
            "webimageOldFileName" => "test_image.gif",
            "webimageName" => "test_image",
        ),
    ),
);
```

### Action delete

Delete an existing web image

```
$data = array(
    "token" => $token,
    "tokenHash" => $tokenHash,
    "objectType" => "webimages",
    "objectAction" => "delete",
    "values" => array(
        array(
            "webimageID" => "46628",
        ),
    ),
);
```
