

# HTTP API object "newsarticles"

## Examples

### Action publicView

Retrieve one specific news article.

```
$data = array(
    "apikey" => $publicApiKey,
    "objectType" => "newsarticles",
    "objectAction" => "publicView",
    "values" => array (
        array("articleID" => "24"),
    ),
    "fields" => array("articleTitle","articleOrgID")
);
```
