HTTP API object "submittedforms"

⚠️ This object pertains to forms created using our Online Forms service only

Examples

Action search

Search for submitted forms. In this case, find submitted forms that have zero comments.

```
$data = array(
        "token" => $token,
        "tokenHash" => $tokenHash,
        "objectType" => "submittedforms",
        "objectAction" => "search",
        "search" => array (
                "resultStart" => 0,
                "resultLimit" => 200,
                "resultSort" => "submittedformID",
                "resultOrder" => "asc",
                 "filters" => array(
                        array(
                                "fieldName" => "submittedformCommentsCount",
                                "operation" => "equals",
                                "criteria" => "0",
                        ),
                 ),
                "fields" => array("submittedformID")
        ),
);
```
