

# Using the animal highlight feature

This feature is only available with the Website Service.

The highlight number is used when displaying the **Highlighted Animals** section on your **Website's Front Page**, the **Animals Browse** and **Animals List** pages.

## Where do I find it?

You'll find the field in the **Administrative Information** section of fields when **Adding or Editing an Animal**.

## On this page:

- [Using the Highlight number to change the order of Animals on the Animal Browse Page.](#)

Things to know about highlighting animals:

- You can find the field in the Administrative Information section of fields when adding or editing an animal.
- The highlight number is a priority number or order number for your animals with the value (0-10) on the **Add an Animal** or **Edit an Animal** page.
- The lower the highlight number, the higher the animal will appear on the list; 0 is the highest and 10 is the lowest.

When little Alicia was first rescued, she would not want to walk for days. We had to pick her up and place her on the grass for potty time. She was stiff, frozen and very scared of what she thought was coming next. Her prior owner said they ha...[read more about Alicia](#)

Using the Highlight number to change the order of Animals on the Animal Browse Page.

In this example, I've changed the highlight number for Black Diamond and Hardy to 0. This places them before the other animals on the browse page.
