

About the online store checkout process

This section describes the checkout process used by your website's online store.

Online store checkout:

1. The visitor finds an item he/she would like to purchase and they add the item to their shopping cart.
2. The visitor clicks **Checkout**.
3. The visitor completes the checkout process with PayPal by paying with their credit card or PayPal account.
4. The organization receives notification from PayPal that a purchase has been made.

The financial aspects of the transaction are handled by PayPal, not your RescueGroups.org website. Your website is not involved in any way with the purchase process or any financial information.
