

Understanding the advanced styling of Toolkit keys or custom CSS

Each Pet Adoption Toolkit can be customized with the use of CSS. You can find this functionality by going to **Features > Pet Adoption Toolkit** and selecting a specific toolkit. From there, select the Update Styles option to access your custom CSS options.

Using CSS with the Toolkit

Cascading Style Sheets (CSS) is a simple mechanism for adding style (e.g. fonts, colors, spacing) to Web documents.

To edit a stylesheet, you need to be familiar with CSS. You can learn more about CSS and what you can do with it from [many sources](#).

With the three levels of CSS styles in the **Pet Adoption Toolkit**, you can go from basic changes to your own custom design.

The Toolkit includes three levels of CSS styles

Styles	Location	Purpose
Default	Included in the Toolkit code, and is inaccessible to the user	Provides default styles
Search Container Options	Search container background color and search result hover color	Allows simple selection of colors

Key Styles (custom style sheet)	Located within each key, blank style sheet (enter custom CSS on the Style and Color Options) <div data-bbox="414 163 1367 508"> <div>Custom CSS</div>  </div>	Allows custom styles for advanced users
--	---	---

Advanced Styling of Toolkit (Custom CSS)

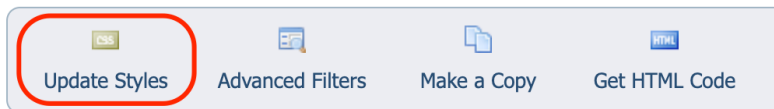

Within each toolkit layout, there may be some elements that can be further styled to get a more customized look/feel. You can add custom styles to your own third party website, or to the Toolkit itself.

Add custom styles to your Toolkit

1. Open the Toolkit by going to **Features > Pet Adoption Toolkit** and selecting the Name of your Toolkit
2. Select **Update Styles**

Toolkit Key: Dogs

Examples

The different toolkit layouts will have different HTML elements and element names, so the examples below may not work for your layout choice. We recommend that you inspect your Toolkit using your browser's Development Tools to ensure you are using the right CSS styles for your particular Toolkit.

Style text under the animal photo in grid view

If you wanted to increase the font size of Bailey's name, and remove the breed, you would add the following CSS to the Custom CSS box in the toolkit Key Edit page.

```
div.petname {  
  font-size: 22px;  
}  
  
div.petbreed {  
  display: none;  
}
```

Bailey's name is now 22px, and the *petbreed* field is not showing.

Remove the Organization Contact info box on an animal's detail page

Add the following CSS to your Toolkit

```
.rgtkPetInfoBox{  
  display: none;  
}
```

Increase size of images in grid layout and make them square

If you are using the search layout Grid 3, you can add the following CSS to your Toolkit.

```
.rgtkSearchPetPic {  
  height: 150px !important;  
  width: 150px !important;  
  background-size: cover !important;  
  background-position: 50% 50% !important;  
}
```

Increase the size of primary image on Animal Detail page

For pet2 layout, you can customize the size of the primary image, like in the following CSS code.

```
#rgtkPetPicturePrimary_0 {  
width: 250px !important;  
height: 250px !important;  
}  
  
#rgtkPetPicturePrimaryImg_0 {  
width: 250px;  
height: 250px;  
}
```
