

Getting Started with the Pet Adoption Portal

The **Pet Adoption Portal** helps organizations gain as much exposure for their adoptable animals as possible with as little overhead as possible by updating many of the national pet adoption websites at one time. Now your volunteers, currently updating only one adoption list, can update all the major adoption listing websites at once, gaining more exposure for your animals while doing the same amount of work. And if your volunteers have been updating sites one at a time, the **Pet Adoption Portal** allows one volunteer to update one site to populate many. **And yes, it's completely free!**

Here's a video about the Pet Adoption Portal that we hope you'll enjoy.

Benefits

A few of the benefits of using the **Portal**:

- Single-site updating of all the [major adoption listing websites](#).
- Completely and totally free service, nothing to buy, no fee for data uploads, no charges!
- No forced advertisements in your pet descriptions.
- No forced pet list scroller on your website.
- Ease of setup because we do most of the work for you, including getting set up with most of the adoption listing site AND adding your animals!
- Ease of use: update one site to update all.
- Data and picture exports available at any time.
- Peace of mind: we never delete your data.

Where to Start

We recommend these steps before you begin setting up your service:

1. Review the [Getting started with RescueGroups.org guide](#).
2. Review this [Getting started with the Pet Adoption Portal](#) section.
3. Review your [organization's contact information](#) for accuracy and as a refresher to you.
4. Add your animals. For more information about adding animals, see the [Animals](#) section of this guide.
5. Enable exports.
6. Add volunteers.

Don't worry. If this is all overwhelming, we're here for you! You can open a [support ticket](#) with us at any time.

In this section, you'll find all the information you need to set up your service for the first time. You'll also learn about other services that we offer.

Do you need help?

If at any time you don't understand the instructions or you're stumped, just send us a support ticket and we'll be glad to help you - either to get started or to continue managing your account.

Open a support ticket by using the fields on the left navigation bar at <https://rescuegroups.org/support/>. You can also update your existing support ticket with new information or questions.

Create a new support ticket

Before opening a new support ticket, please search our [User Guide](#).

If your question is not account-specific, please consider posting to our [Questions](#) page. We answer all questions as quickly as possible, and that way the community can benefit from the knowledge.

Please provide a short summary of your issue or question:

Enter a short summary of your question

Create support ticket

Update an existing support ticket

You will find your ticket number in any of the emails you received.

Please enter your support ticket number:

Enter your ticket number (like ABC-1234-XYz)

Open support ticket

The first steps
