The following actions are available for Custom CSS with the specified service and user roles:

Action	Description	Services	User Roles
View		Web Site	Site Admin only
Change		Web Site	Site Admin only

Modifying the CSS on your website

Advanced users can customize their websites further by modifying the Cascading Style Sheet (CSS) available with their [RescueGroups.org](#) website.

To do this, you or one of your volunteers can use a tool like Chrome Developer Tools or Firefox Developer Tools to see the built-in elements on your RescueGroups.org website and then add the modified styles to Website > Custom CSS.

If you do not understand CSS, this might not be something you want to attempt immediately. There are articles about CSS and the RescueGroups.org community may be able to advise you when you ask specific questions.

RescueGroups.org may also be able to help add or update information on the Custom CSS to help you change the appearance of your website.

⚠

Styles should only be changed or added if you understand the impact and function of the change.

Changing the content section header

To customize the CSS that appears for Highlighted Animals, News, and Events for the hard-coded sections that can be turned on/off on the home page use the following:

.contentSectionHeader

```
.contentSectionHeader {
font-family: 'Ubuntu', sans-serif;
text-transform: uppercase;
font-size: 28px;
color: #231F20;
line-height: 1.2em;
margin-top: 20px;
border-bottom:none;
border-top: 1px solid #BAB9B8;
}
```

HIGHLIGHTED DOGS SEE ALL THE DOGS!

Chip is playful and easy going and will make a great buddy
enjoys exercise and fun. Chip can/ will jump a fence so a m
fence would be needed to keep him from...**read more about**

.contentSectionHeader
