

Changing an animal's status_Content_Portal_v1

Changing an animal's status

- An animal's status can be changed among the statuses without losing any information.

The screenshot shows a web form with several fields. The 'Status' field is highlighted, and its dropdown menu is open, displaying a list of 16 status options. The options are: Adopted, Available, Deleted, Domestication, Euthanized, Free Roaming, Hold, Intake, Not Available, Passed Away, Pending, Reclaimed, Released, Returned, Sponsorship, Stolen, Strayed, Transferred, and Treatment. The 'Status' field is marked with a red asterisk, indicating it is a required field. Other fields visible include 'Species', 'y breed', 'ary Breed', 'ted breed', 'Sex', 'Altered', and '(General)'. The dropdown menu is currently set to 'Choose one...'.

- Depending on your service, you may not have all of these statuses.
- The statuses that display animals on your website are: Available and Sponsorship. These other statuses will remove an animal from actively displaying on your website.
- Tip: You can use the Hold or Pending status to quickly remove an animal from displaying on your website. This can give you time to process an adoption.

Adoptions

With the Pet Adoption Portal, you can change an animal's status to Adopted. However, when you upgrade to either the Data Management or the Website Service, we provide an Adoptions feature which will change the way you handle Adoptions. Should you choose to upgrade, please read the Adoptions section of your new service User Guide to take full advantage of this feature.
