

Mixed or Unknown breed

At times, you may not want to set a primary breed for your dog animal records. Or, you may not know of any breed that you want to identify as primary. In the past, the primary breed field was required when adding an animal. Due to feedback from our organizations, we have changed this requirement for dogs. You may now choose not to identify a primary breed.

When you identify the species Dog on an animal record, the primary breed will automatically be set to *Unknown breed*. If you do not want to identify a primary dog breed, just leave that default setting. In our first example of adding an animal record below, you can see we have not yet identified a species, so the primary breed is not set:

| | |
|-----------------|--|
| Name * | <input type="text" value="Charm"/> |
| | (List: Male Female Random: Male Female) |
| Status * | <input type="text" value="Available"/> |
| Species * | <input type="text" value="Choose one..."/> |
| Primary breed | <input type="text" value="Select a species..."/> |
| Secondary Breed | <input type="text" value="Select a species..."/> |
| Mixed breed | <input type="radio"/> Yes <input type="radio"/> No <input checked="" type="radio"/> Unknown |
| Sex | <input checked="" type="radio"/> Female <input type="radio"/> Male <input type="radio"/> Unknown |

Once you set Species to Dog, the primary breed value defaults to Unknown breed:

| | |
|-----------------|--|
| Name * | <input type="text" value="Charm"/> |
| | (List: Male Female Random: Male Female) |
| Status * | <input type="text" value="Available"/> |
| Species * | <input type="text" value="Dog"/> |
| Primary breed | <input type="text" value="Unknown breed"/> |
| Secondary Breed | <input type="text" value="Choose one..."/> |
| Mixed breed | <input checked="" type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Unknown |
| Sex | <input checked="" type="radio"/> Female <input type="radio"/> Male <input type="radio"/> Unknown |

If Species is set to any other option besides Dog, the primary breed must still be identified:

Name *

(List: [Male](#) [Female](#) | Random: [Male](#) [Female](#))

Status *

Species *

Primary breed *

Secondary Breed

Mixed breed ☐ Yes ☐ No ☒ Unknown

Sex ☒ Female ☐ Male ☐ Unknown

 This change only pertains to dogs. All other species still require a primary breed.

Dogs without a breed are exported to Adopt-a-Pet.com and Petfinder using the breed identifier: *Mixed breed*. In all RescueGroups.org services, such as our Website and Toolkit, these animals will be listed as *Unknown breed*.

 **IMPORTANT**

If you do not select a primary breed but do select a secondary breed, the secondary breed you select will populate the primary breed field on the adoption sites. If you import an animal to us with a secondary breed without a primary breed, our system will use the secondary breed as the primary since that is how we will export it. The secondary breed is optional. You do not have to select a breed for that field.
