

Creating your own online forms questions

Remember, you can add all the default questions and customize them, or you can create your own questions. You can also combine default questions with original questions.

Where do I find it?

To create your own questions, go to **Features > Online Forms** and click the **Questions** button, and click the **Create a Question** button.

On this page:

Creating Questions

If the question you want to ask isn't in the database, or you want to create all of your questions, click the **Create a Question** button. A form displays that guides you through the question creation process.

Save Question

The fields are:

- **Name** - the name you want to assign the question, which should be easy to recognize. In the example above, note the *Adopting for* question. It's easy to see this question will ask the visitor, "Who are you adopting this animal for?"
- **Display Question** - this is the question you ask the visitor, exactly as you want it to appear in your form.
- **Answer Type** - see the guide, [About answer types](#) for a detailed explanation.
- **Select Groups** - **Select Groups** are groups of answers that users select from. See the page in this guide, [Using Select groups](#) for a detailed explanation. Use the drop-down menu to select the group for the question you are creating. When you create a select group, it appears in the drop-down list.

- **Required** - do you want to make this question required in order for the visitor to go on?

Remember to save the question.

Prohibited Questions

Warning

There is certain sensitive information that is prohibited from use in your [RescueGroups.org](#) account. You cannot ask for an applicant's driver's license number, social security number, or credit card number, for instance, on an online form. Using that type of information results in a violation of your Terms of Service and may result in the form or question being blocked from use.

Per our Terms of Service (<https://rescuegroups.org/terms-of-service/>), [RescueGroups.org](#) may not be used for the collection, storage, or processing of Personally Identifiable Information (PII) or sensitive information (in whole or in part), including but not limited to Social Security Numbers (SSN), Driver's License numbers, state ID information, birth date or exact age, credit card numbers, mother's maiden name, financial/bank information, passport information, and healthcare/medical information.

Please ensure none of the questions that you create collect any sensitive information like those listed above. One of the most difficult for organizations is that you may not ask for birthdate, as they are looking for the age of the applicant. While this would violate our Terms of Service, you may ask for *general* age categories. For example, a dropdown question may look like the following:

What is your (the applicant's) General Age?
Under 18 years old
18-24 years old
25-34 years old
35-44 years old
45-54 years old
55-64 years old
65-74 years old
75 years or older

The image shows two overlapping web forms. The background form is titled 'Create an Online Form Question' and has the following fields: 'Name *' with the value 'General Age', 'Display Question *' with the text 'What is your (the applicant's) General Age?', 'Answer Type *' set to 'Dropdown Select Box', 'Select Groups' with a dropdown showing 'General Age' and a plus icon, and 'Required *' with radio buttons for 'Yes' and 'No' (where 'No' is selected). Below these is a note: 'Questions of type Checkboxes or Multiple Select Box cannot be required'. The foreground form is titled 'Add an Online Form Select Group' and has 'Name *' set to 'General Age' and an 'Options' list containing: 'Under 18 years old', '18-24 years old', '25-34 years old', '35-44 years old', '45-54 years old', '55-64 years old', '65-74 years old', and '75 years or older'. It also has a checkbox for 'Alphabetize the list before saving' which is unchecked. A black arrow points from the 'Select Groups' dropdown in the first form to the 'Name' field in the second form. Both forms have 'Cancel' and 'Save' buttons at the bottom.
