

About roles, security, and permissions

RescueGroups.org's security features allow you to grant restricted access to the features of your service to other members of your organization.

When your account was created, one person was given full administrative (Site Admin) permissions. That person can then grant permission to other volunteers.

For example, one of your volunteers may need to add new animals but does not need to add animal Journal entries or add new News items. You can give that user only the permissions he or she needs to do their job.

A *role* is a task a volunteer performs; *permissions* give them the capability to do the task and are connected to the role. Roles are assigned to a volunteer's **User Login Account**.

 **IMPORTANT**

Depending on the service you are using, you may be able to make use of all or only some of the roles and permissions outlined in this chapter. If you are having trouble with any of this information, [please fill out a support ticket](#) so that we can help you.

 **Where do I find it?**

You can assign roles to the [User Login Accounts](#) of your volunteers by going to **Contacts > User Login Accounts**.

Contacts	Website	Features

Available Organization Security Roles

The following security roles are available to assign to User Login Accounts. Find the description of the activities you want your volunteer to perform, and then assign the corresponding role.

 All of your organization's helpers with the role of Volunteer, that is, anyone with a RescueGroups.org login who is assigned at least one volunteer-level role, is able to access some of your basic information about Contacts and Animals. See the Volunteer role information in the table below.

Role Name	Activities the volunteer can perform
-----------	--------------------------------------

Volunteer (** Recommended for all volunteers)	<p>Can <u>view</u> all of the following:</p> <ul style="list-style-type: none"> • All animal information listed on the animal's record, including that for deceased or adopted animals • Animal locations marked as private • (Website Service only) All animal files, including those marked as private, only when logged into your organization's website. Please note, without the website service, or to access animal files when not logged into the organization's website, a volunteer must also have the role of Animal Add. • Contacts • Animal foster information • All colonies • All adoptions • Volunteers-only pages • Adopters-only pages • Can view and print kennel cards
