Adding a link to an external page

To create a link on one of your web pages to an external page:

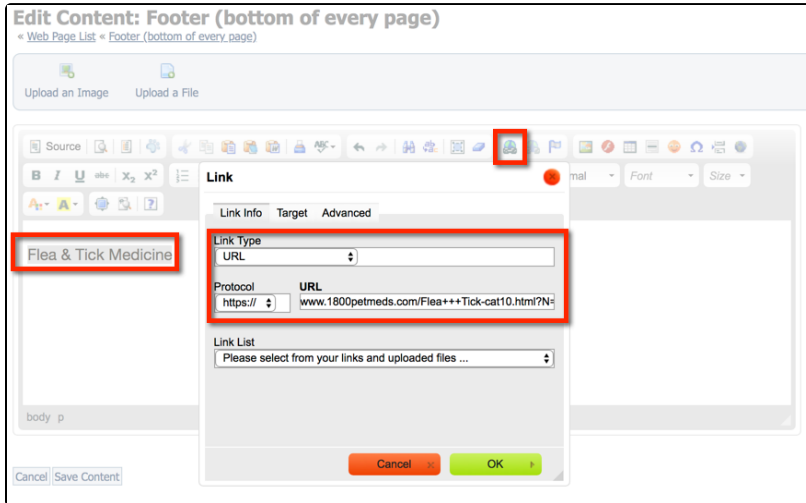

1. Scroll down the list of your web pages to the one you want to change by adding a link. Click the **Edit** icon to the left of the name of the web page.

2. In the WYSIWYG editor, type the words that you want the reader to click to go to the URL you will insert.
3. Select that text with your cursor.
4. Click the **Link** icon in the page editor at the top of the page.

5. Make sure **Link Type** is set to **URL**.

6. Next to **Protocol** select http or https.
7. In the **URL** field, paste the URL to the page you want readers to view.
8. Click **OK**.
9. Click **Save Content**.
