_Updating_and_confirming_your_domain_name_contact_information_Intro_v1

Domains must be associated with accurate contact information. You can update the contact information on your domain names at any time.

Where do I find it?

You can update your domain contact information from the **Domains** control panel. Go to **Services > Account Administration > Your Services > My Domains (Under the Domains Menu)> Edit Contact Information.**

Note- If you are looking for what domains are associated with your account or to associate a domain to your account please see our guide on Adding an existing domain to your account.
